# Elettra

Int. Reg. (1995)

Gamma di apparecchi a luce diffusa per lampade fluorescenti elettroniche, ad incandescenza e alogene per attacco singolo. Struttura in metallo, disponibile in nickel satinato e cromo. Diffusore in policarbonato nei colori: bianco, albicocca o sabbia. Segno caratteristico della gamma è un'esile spirale metallica che unisce il diffusore alla struttura metallica portante. La gamma comprende: Lampade da terra, da tavolo, o a parete.

Range of luminaires for diffused light that take screw socket electronic compact fluorescent, incandescent or halogen bulbs. Housing in metal, available in brushed steel and chrome. Polycarbonate diffuser in white, apricot and sand. A distinctive feature in the design of this range is the light metal spiral used to fit the diffuser to the luminaire's metal frame. The range comprises floor, table and wall lamps.

Eine Serie für diffuses Licht mit der Möglichkeit, einseitig gesockelte Kompaktleuchtstofflampen, Sockel E27 mit integriertem Vorschaltgerät oder für normale Allgebrauchslampen sowie für Halogenglühlampen E27 einzusetzen. Das Metallgestell ist in edelstahl matt oder chrom erhältlich. Die Schirme, die mit einer Metallspirale gehalten werden, sind in den Farben Weiß, Aprikot oder Sand erhältlich. Die Serie besteht aus Steh-, Tisch- und Wandleuchten.

Série d'appareils avec lumière diffuse pour lampes fluorescentes électroniques, incandescentes et halogène pour simple attache. Structure en métal, disponible dans les finitions nickel satiné et chrome. Diffuseur en polycarbonate disponible dans les couleurs: blanc, abricot ou sable. Le signe caractéristique de la série est une mince spirale métallique qui unit le diffuseur à la structure métallique portante. La série est composée pour: lampadaire, lampe de table, ou applique.

Серия светильников рассеянного света для флюорисцентных элекронных ламп накаливания и аллогенных для сингулярного присоединения. Каркас из металла, рассеиватель из поликарбоната разных цветов: белый, персиковый и песочный. Характеристическая особенность серии – спиральный металлический гексил, который соединяет рассеиватель с несущей металлической структурой. В серию входят: напольные, настольные и настенные светильники.
